CAREER SUMMARY

Python Developer with 1+ year of experience in backend development using Django and RESTful APIs. Currently working at Trust Fintech Limited on banking and financial systems, including MIS reporting and onboarding platforms. Skilled in API development, database design, authentication systems, and React.js integration. Strong focus on scalable architecture, performance optimization, and secure application development.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL

Frameworks: Django, React.js

Frontend: HTML5, CSS3, Tailwind CSS, Bootstrap, jQuery, React js

Database: MySQL, Postgresql

Backend: REST API Development, Authentication & Authorization, Session Management, AJAX

Concepts: OOP, MVC Architecture, Role-Based Access Control

Tools: Git, GitHub

PROFESSIONAL EXPERIENCE

TRUST FINTECH LIMITED | Python Developer | Pune

June 2025 – Present

- Developed Django-based backend systems and RESTful APIs for banking and financial applications
- Built MIS Reporting Module with 5 categories and 15+ sub-reports with dynamic multi-criteria filtering
- Implemented export functionality supporting PDF, CSV, Excel, Word, HTML, and TXT formats
- Integrated React.js frontend with backend APIs for Bank Onboarding platform
- Optimized performance using caching and implemented SLA/TAT tracking and audit logging

AROMA BRAND SOLUTIONS | Python Developer (Part-Time) | Pune

Nov 2024 – Feb 2025

- Developed backend modules and CRUD operations using Django framework
- Implemented user authentication and role-based access control
- Improved application security and data handling efficiency

HEURISTIC TECHNOPARK | Python Django Intern | Nashik

Jan 2023 – Mar 2023

- Developed web applications using Python and Django
- Implemented user authentication and authorization systems
- Collaborated with the team on backend development, debugging, and testing

CLOUDCREDITS | Cloud AI Intern | Jaipur

Mar 2025 – Apr 2025

- Developed AWS Lambda functions using Python to automate workflows
- Built serverless solutions and integrated AWS services
- Participated in code reviews, documentation, and Agile development practices

PROJECTS

Bank Onboarding – MIS Reporting Module | React.js

- Developed MIS reporting module with 5 categories and 15+ sub-reports for onboarding, products, documents, transactions, and audits
- Built dynamic multi-criteria filtering (Bank, Category, Product, Status, Date Range) with real-time updates and deep linking

- Created interactive report viewer with pagination, zoom controls, print, and export (PDF, CSV, Excel, Word, HTML, TXT)
- Developed frontend JS architecture for dynamic rendering, state management, and API integration
- Implemented caching for master data, TAT/SLA tracking, breach detection, and onboarding status summary reports

Tech: React.js, REST APIs, MySQL, JavaScript

Microfinance Management System (Microfins) | Django, Python, MySQL

- Developed large-scale financial system with 100+ modules covering account management, transactions, loans, and compliance
- Built 113+ views (CBV & FBV) and 111+ dynamic forms with AJAX-based real-time interactions and validations
- Implemented role-based access control, custom authentication, and multi-language support (English, Hindi, Marathi)
- Designed financial calculation engines for EMI, interest, and maturity; managed 49+ database models
- Created reusable base form and view classes reducing code duplication by 40%

Tech: Django 5.2.1, Python, MySQL, Tailwind CSS, jQuery, AJAX

Pothole Detection System | Python, YOLOv7, Flutter

- Built ML model for pothole detection achieving 15% accuracy improvement using 10,000+ labeled samples
- Designed system architecture with role-based access (Admin, Customer, Authorities)
- Developed UI improving data labeling efficiency by 20%

Tech: Python, YOLOv7, Flutter, Firebase (Firestore & Cloud Storage)

Task Management System | Django, Python, Rest Apis, JWT

- Developed a secure Task Management REST API using Python, Django REST Framework, PostgreSQL, and JWT Authentication with role-based access control.
- Implemented complete CRUD operations for tasks, users, comments, and task history with proper relational database design and RESTful APIs.
- Designed role-based authorization (Admin, Manager, Employee), enabling task assignment, controlled access, and employee-specific task visibility.
- Integrated JWT authentication, password encryption, custom permissions, API validation, and PostgreSQL for secure backend development.
- Built scalable backend architecture following MVC architecture, repository pattern, reusable serializers, and REST API best practices.

Tech: Django, Python, Rest Apis, Postgresql, JWT, Postman

Student Management System | Django, Python

- Developed web application with role-based access control (Admin, Teacher, Student)
- Implemented CRUD operations and authentication using Django's built-in auth system

Tech: Django, Python, MySQL, HTML, CSS, Bootstrap

EDUCATION

Bachelor of Engineering – Computer Engineering

Savitribai Phule Pune University (CGPA: 7.23) | 2024

Diploma in Mechanical Engineering

MSBTE (89.23%) | 2021

HSC – Maharashtra State Board (58.62%) | 2019

SSC – Maharashtra State Board (85.40%) | 2017

CERTIFICATIONS

- Python Full Stack Development – QSpiders Training Institute, Wakad
- Developer and Technology Virtual Experience Programme – Accenture Forage
- Generative AI – LinkedIn Learning
- AI Tools & ChatGPT Workshop – Be10x
